

# Pandia

# 3D

## Automated 3D quality control along the entire production process

## Pandia 3D

+49 (0) 170 99 54 367

## Our Software

### Intuitive & Affordable

Since our system is **easy** to use and **customized** to your specific needs, it will **prevent** you from **avoidable rejects**.

### Fast & Precise

**Continuous & precise monitoring** of the quality of your products is now possible within a **few seconds** to save you **time** and **money**.

### Innovative & Reliable

Objects of **any complexity** can be compared either with a **CAD model** or a **reference scan** for **easy verification**.

Here's a short product-video

## Your Benefits

Quality Control - **shows issues & defects early** in the process, **before** they become bigger problems

**Objective & intelligent** quality inspection of your goods & components - accurate to the **tenth of a millimetre**

**Flexible integration** into running processes via our user-friendly **plug & play** installation

**Prevents** rejects, **reduces** human errors and **enables** you to make **data-based** decisions & forecasts

## Sounds good?

Feel free to **call us** or send us an **Email**.

We are **happy** to give you a **free demo of our software!**

We're sure to have the perfect solution for you!
